RISS INTEL

Unlocking Investigative Leads

What is the RISS Criminal Intelligence Database (RISSIntel™)?

RISSIntel provides a real-time, online federated search of more than 60 RISS and partner systems. RISSIntel is a modern, user-inspired, and flexible system that is housed in the secure government cloud. RISSIntel is accessible via the RISS Secure Cloud (RISSNET™) and contains millions of intelligence records submitted by RISS member agencies on targets and organizations suspected of involvement in criminal activity, as well as locations, vehicles, weapons, and telephone numbers. After entering information into RISSIntel, officers often discover that they are investigating the same target as another law enforcement agency or officer.

RISSIntel provides the target and investigative data deconfliction necessary to enable officers to leverage each other's information and increase investigative efficiency. RISSIntel complies with the Criminal Intelligence Systems Operating Policies, 28 Code of Federal Regulations (CFR) Part 23, issued by the Office of Justice Programs, U.S. Department of Justice.

Why should I use RISSIntel?

- Enables agencies to use it as their own intelligence system.
- Provides user-friendly features and functionality utilizing the latest technology.
- Enables officers to search for records, review results, and seamlessly navigate the system easily, quickly, and securely.
- Equips officers with a dark mode to use in their patrol cars at night.
- Continues to support the “one-stop shop” ability for searching RISSIntel records and partner state and regional intelligence databases with the single federated query feature.
- Includes features such as officer notifications, advanced searches, reports, linking entries, data import, and more.
- Enables a quick search of common fields using a simplified form.
- Enables the use of specific location entry through the use of mapping and geocoding tools. Users also have the option to save entered information directly as a new record streamlining data entry.
- Integrates in-app assistance through short feature-specific videos including release notes.
- Provides a “My Records” feature to view records the user has submitted or records submitted on the user's behalf.
- Provides a workspace feature for the user to work on groups of records simultaneously.

About RISS

RISS is a proven, trusted, and evidence-based program that supports the needs of thousands of local, state, federal, and tribal criminal justice and public safety professionals while helping advance the nation's criminal justice strategy. RISS is composed of six regional centers and the RISS Technology Support Center (RTSC). RISS focuses on three priorities: investigative case support; secure information and intelligence sharing; and officer safety, deconfliction, and law enforcement wellness. RISS services and resources impact investigative efforts and operations daily. This is evident in the hundreds of shared success stories agencies and officers submit to RISS each year. To read these, as well as access information regarding statistics and quotes from each state, visit www.riss.net/Impact.

RISS offers full-service delivery, from the beginning of an investigation to the ultimate prosecution and conviction of criminals. An officer can simultaneously query multiple intelligence databases, retrieve information from investigative systems, obtain assistance from intelligence research staff, borrow equipment, receive training, and use analytical resources to help prosecute criminals.

RISS is congressionally funded and administered by the U.S. Department of Justice, Office of Justice Programs, Bureau of Justice Assistance (BJA), through grant awards. BJA provides funding oversight and program management for the RISS Program.

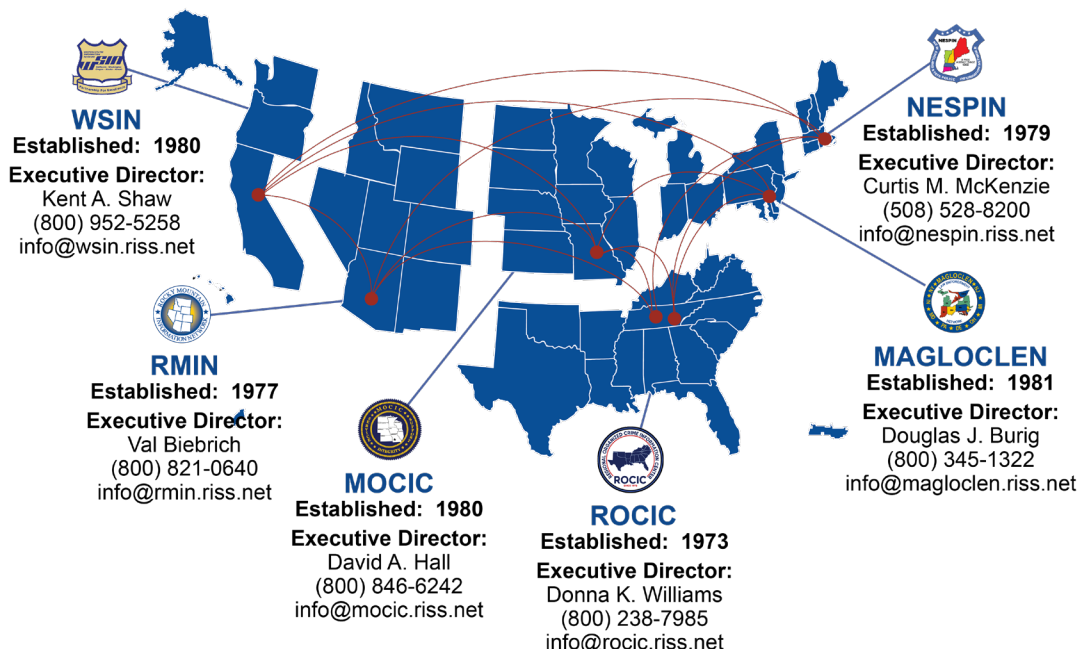

Who can access RISSIntel?

RISSIntel is available to approved RISS member law enforcement and criminal justice agencies. RISSIntel is accessible on a variety of devices, such as desktops, laptops, tablets, and mobile devices, and will function across operating systems.

How do I learn more about RISSIntel?

Follow the link or scan the QR Code to watch a video preview highlighting the improved features of RISSIntel.
