

Mobile App

The power of RISS is now in your pocket. The RISS Mobile App brings the secure information sharing and communication capabilities of the RISS Secure Cloud (RISSNET) to the smartphone. Authorized RISSNET users in the field have the ability to search millions of available records, collaborate with other RISSNET users, and share information in a secure, intuitive mobile app on their smartphone. This app is available to authorized users in RISS member agencies.

Advanced Search

The RISS Mobile App provides the capability to search information across platforms simultaneously, including the RISS Criminal Intelligence Database (RISSIntel) and the RISS Collaboration Websites (including the RISSLeads Investigative Website). An advanced search feature enables users to conduct more refined search of RISSIntel.

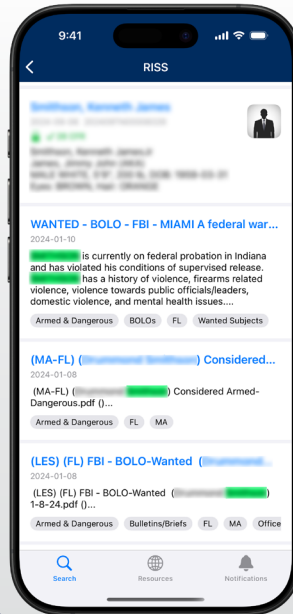

As with all RISS resources, the security of the RISS Mobile App is paramount. User authentication is required to use the RISS Mobile App. Multiple layers of security are used to ensure a robust, proactive level of prevention and protection of the RISS Mobile App's integrity and security.

Regional Information Sharing Systems® (RISS) Program

Mobile App

RISSIntel

RISSIntel enables users to query criminal intelligence information and seamlessly coordinate among RISS member agency users who may be investigating the same subject. Using the RISS Mobile App, authorized users can search and submit records, review results, and connect with other officers who may have additional information about the subject.

The RISS Mobile App is available for download from the Apple App Store and the Google Play Store.

Google

For more information on the RISS Program, visit the RISS public website at www.riss.net.

RISSafe

The RISS Officer Safety Event Deconfliction System (RISSafe) provides the ability to submit events for officer safety deconfliction. RISSafe is accessible and monitored 24/7/365 and is a reliable, secure, and critical tool for officer safety. RISSafe is integrated with other nationwide deconfliction systems. From the RISS Mobile App, officers can enter operations, review conflicts, and respond to deconfliction events to ensure officer safety from the convenience of their mobile devices.

Notifications

RISS Mobile App users will receive RISS notifications in their RISS Mobile App.
